About our jposug

- Jposug has been established in 2006
- Nihon Sun Users Group(NSUG),which had been established in 1988,used to lead japanese Solaris community but it went into recess in 2007,and then has been combined jposug.
- About 260 of jposugers are represented by mainly system administrator,developer.
- 20% of jposugers are active – we are posting ug-jposug ML,chatting #opensolaris-jp IRC, and we attend studying meeting and seminars.

About jposug(cont'd)

- Lately We have been holding the seminars and studying meeting frequently and many of jposug member contribute these events,that makes bigger our community

Our challenge for jposug community

(Tokyo OpenSolaris StudyGroup)

- To expand our community, We started on Oct 18th in 2008. Our leader Kato-san proposed it.
- Its purpose is to study 'Solaris Internal', but sometimes we study some cool topics about OpenSolaris (how to build and so on)
- At first time there are a few attending studying meetings. but lately 20-30 jposugers attending meetings.
- Many of us help this studying meetings to expand jposug community. we got started the studying meeting for beginners last month as 'another' studying meetings.

Our challenge for jposug community

(Tokyo OpenSolaris StudyGroup(Snap))

Tokyo OpenSolaris studying meeting in Apr.

Our success for jposug community

(Expanding our activities to osug communities)

- Expanding our activities to osug communities is good for expanding osug communities.
- I would like to introduce three successful activities for osug communities.
- We trying to introduce our activities in English (not our native tongue Japanese),it is not so good expression but many of osugers are much interested and have much talks and contacts with us.
- You can try to expand your activities to osug communities,they must be welcome:)

Our success for jposug community

(Expanding our activities to osug communities(OpenSolaris on Eee PC))

- I tried to install OpenSolaris to ASUS Eee PC, you know it is the most familiar netbook all over the world. I have established the project called “OpenSolaris on Eee PC” with Robs of Sun China ERI and Tim of Sun Ireland.
- Lately I have released customized OpenSolaris distro including some drivers for Eee PCs, So you can use it easily.
- For more detail, please follow the my blog:
 - <http://www.masafumi-ohta.blogspot.com>

Our success for jposug community

(Expanding our activity to osug community
(OpenSolaris LiveUSB Creator for Windows))

- Our jposuger Chonan-san made LiveUSB Creator for Windows.
 - <http://devzone.sites.pid0.org/OpenSolaris/opensolaris-liveusb-creator>
- He started to develop it though our opensolaris-jp IRC chat.
- It is very useful tools making OpenSolaris LiveUSB in Windows.you can easliy make it with its GUI.
- His Creator has got into the headline in Genunix.org

Our success for jposug community

(Expanding our activities to osug communities(FreeNIC driver for Solaris))

- It is very much famous for you Our jposuger Murayama-san releasing much NIC drivers for Solaris
 - <http://homepage2.nifty.com/mrym3/taiyodo/eng/>
- He is 'specialist' making NIC drivers we jposuger respect his activities.
- Many osugers and Sun engineers have had contacts with him and ask about the drivers.He is very kind,so you can feel free to ask him.

New Group:Tokyo OpenSolaris Users Group

- Tokyo OpenSolaris Users Group (tsug) has been established last year.it is a sister group of jposug.
- It is international users group – all nationalities must be welcome to our group.and you don't have to live in Japan,only you are interested in OpenSolaris and Japanese (Open)Solaris technologies,you can join tsug.
- We hope it will be like many international communities in Japan – Tokyo Linux User Group,Tokyo2Point0, BarCamp Tokyo...
